Material:	Stainless steel + plastic
Material - the inner part of the lock optionally in all-plastic design	
Surface treatment:	Brushed stainless steel, brushed brass
External dimensions (h x w x d):	114 x 45 x 13,5 mm
Internal dimensions (h x w x d):	132 x 64 x 21 mm
Operating humidity:	≤98%
Operating temperature:	20°C až 70°C:

Function

- The possibility of opening mechanically - with a key!
- Low battery alarm (then opens/closes 150 more times).
- Unique control algorithm, no possibility of copying.

OPTIONS OF OPERATING MODES:

Mode 1 - fixed assigned codes

The locks work without operating software. Each lock has hard-assigned authorized codes.

Function codes: Administrator; User.

Each lock is assigned a new administrator code after installation - usually the same for the entire operation. The administrator code can be used to open the locker and manage authorized user codes, or delete user codes. Subsequently, user codes for individual lockers are assigned. The locks allow you to assign up to 50 user codes for one lock.

Mode 2 - free selection

The locks work without operating software. Each lock has a fixed administrator code assigned to it. The user code does not need to be defined in any way and the user can use any unoccupied locker.

Function codes: Administrator; User.

Each lock is assigned a new administrator code after installation - usually the same for the entire operation. Use the administrator code to open the locker or delete the current valid user code.

ACS-HU cab 12M can be opened mechanically with a key in case of emergency
