Flexible hot desk lockers systems

Flexible offices need a flexible hot desk lockers system which adapts to employees locations, work time and frequency of work.

Open office

Primarily used in open office and so called „activity based" offices. Employees change locker based on place of work inside the building.

Mobile phone operated hot desk lockers

No need for user interfaces accept mobile phone application. Enabled flexible use (short and long-term reservation).
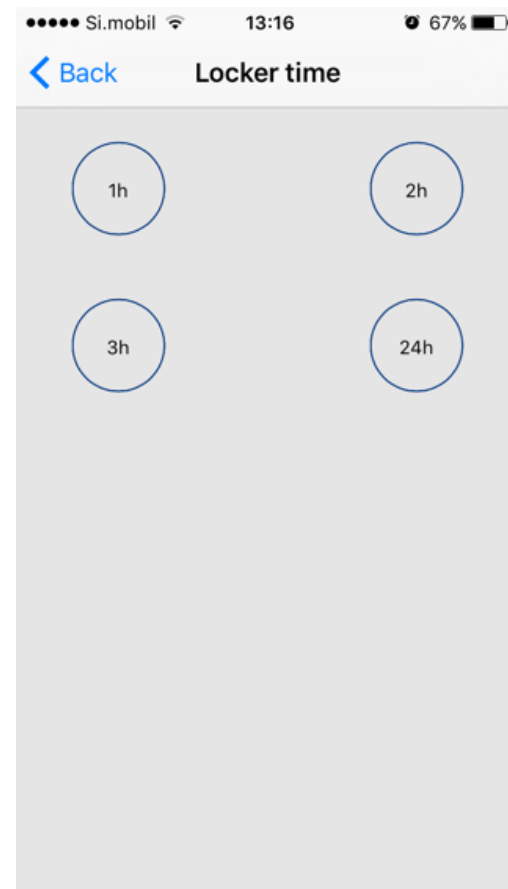

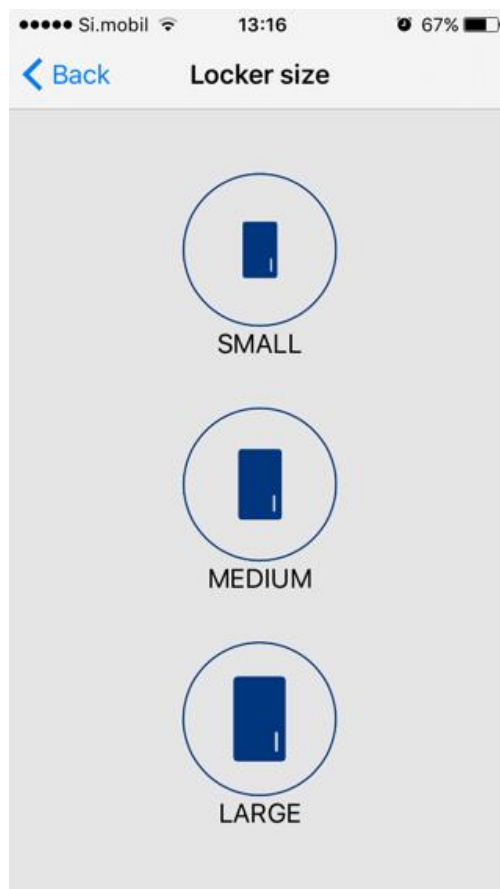

Achieve completly clean lockers design

No need to mount central terminals or lock readers to interfere with the design. Electronic lock is located inside each locker.

Mobile application: assign locker

Mobile application: manage locker
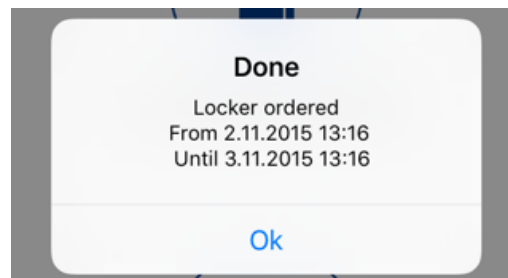

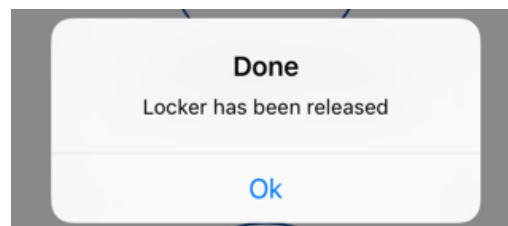

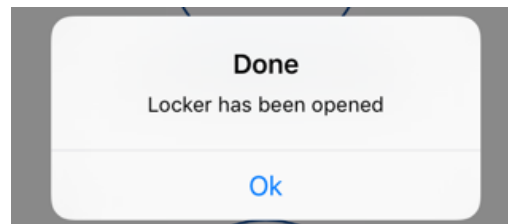

Mobile application: platforms

Q2/2016

Available electronic locks

Automatic open   **Push** to open   **Pull** to open
