#### 1. Overview

The SALTO Neo Cylinder offers value far beyond security, however. Of course, upgrading a mechanical door to electronic access control enhances security, but the SALTO Neo Cylinder provides greater control over the door by offering end users access to audit trails, reports, alerts and so much more wirelessly.

An easy to use rectangular profile design body electronic cylinder that integrates all your physical security needs through networked, standalone battery operated wireless smart cylinders, giving you all the latest users' access information for virtually all of the doors in your facility.

The compact SALTO Neo Cylinder is designed for doors where fitting an electronic escutcheon is not possible or required and can be installed on standard doors, server racks, gates, cabinets, electric switches, sliding doors and more.

It's available in an extensive range of models to suit almost any kind of door – from Europe to Scandinavian countries, from ASIA to the Americas and to Australia and New Zealand.

### Product and features

### 2.Product presentation

### SALTO NEO CYLINDER is compatible with SALTO SPACE and SALTO K

The same hardware (unique reference) can be initialize within SALTO SPACE or SALTO KS. For SPACE you just need to initialize through PPD, and for SALTO KS, as you normally enrol a SALTO KS lock or though Larry 2 commissioning.

### • Cylinder with fully mobile capability

First cylinder enabling technology 100% mobile technology compatible (works on iPHONE and ANDROID).

- JustIN Mobile NFC compatible (SPACE platform ANDROID only)
- JustIN Mobile BLE compatible (compatible with SPACE and SALTO KS platforms ANDROID and IOS)
- Benefits of JustIN Mobile technology
  - Update credentials over the phone network
  - Blacklist transmission over the phone network
  - Automatic audit trail collection over the phone network
  - Automatic battery status collection over the phone network

### Online features without any infrastructure needed.

SALTO

### • BLUEnet ready

This cylinder can be switched onto a BLUEnet wireless online device at any time without changing the hardware.

Online in real-time features in SPACE platform:

- Who accessed the door
- The battery status
- Blacklist release
- Remote openings
- Enable lockdown mode
- Emergency open mode
- Remote cylinder set up changes

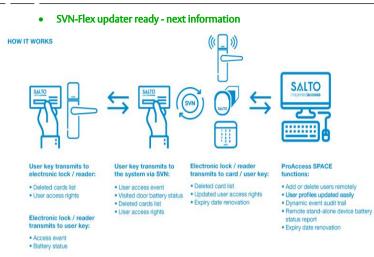

- Remote firmware updates
- Periodic update of the clock

#### • SVN-Flex updater ready

SALTO Neo cylinder will able to enable to benefits of SVN-Flex capability and increase the potential, the efficiency and reliability of the SALTO Virtual Network, increasing the security, the control and the convenience for users and sites and also reducing even more the costs of installation just by updating any user card.

## Product and features

### Product and features Image: Image of the second second

#### • Available for any door any standard

SALTO Neo cylinder is available in an extensive range of models in order to suit almost any kind of door from Europe to ASIA passing through Americas, and also any kind of solution as, swing handles, switches,...

#### Outdoor proof

SALTO Neo cylinder is available in 2 different versions, one of them new design ensure that Neo is ready to resist the most humid and harshest scenarios.

- One model for indoor use only
- One model for outdoor use
  - o New concept of knob that isolates more the electronics
  - New water gasket
  - o Fully IP66 (Knob and body)
  - More performing than ever

130 000 cycles with one set of batteries (4 standard Alkaline batteries). New redesigned clutch system that makes an efficient use of the energy reducing the consumption to the levels never expected.

# SALTO just warrantee the correct and best autonomy with Alkaline LR1 Energivm-batteries (SP01926-5).

### • Stronger than ever

The new SALTO Neo offers 2 models with a higher mechanical security.

- SKG\*\*\*
- VDS

Those 2 models has special:

- Tungsten anti drilling plates
- Rollerballs and anti-drilling system
- Are for outdoor use by default (IP66)

### 2.1 Certifications

The new SALTO Neo cylinders is fully certified in order to:

- CE
- FCC
- MIT
- EN 15684
- EN1634-1 Fire Resistance (90 minutes on wooden door)
- EN1634-1 Fire Resistance (120 minutes on metal door)
- UL10C (180 minutes on metal door)

### Technical properties

### Technical properties

### Battery changes has to be done in dry conditions

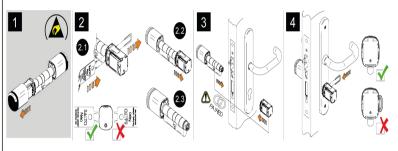

Battery change - Consideration

- Use always SP225542 original tool.
- Make sure that the batteries used are Alkaline LR1 Energivm-batteries (SP01926-5) from SALTO to warrantee the correct autonomy.
- Make sure that the polarity is the correct one.
- When putting back the cover make sure that the LED are on the top to put it on the correct position.
- Do not forget to lock the cover when finished.
- Update the cylinder with the PPD in case it is an offline cylinder to update the internal clock and update the latest changes.

#### 3. Battery change - next

- Remove the knob for specific applications
  - Double knob cylinders, door with protection roses, Switches, etc

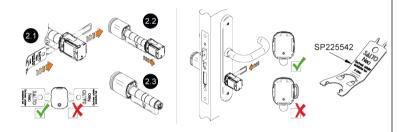

Assembly has to be done in dry conditions.

### Technical properties

### Technical properties

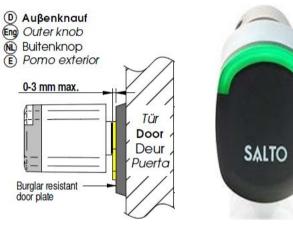

#### 4. Remove the knob for specific applications

- Remove the knob for specific applications Consideration
  - Use always SP225542 original tool.
  - $\circ$   $\,$  Pay attention to the direction of the clip as it is not symmetric.

- o Make sure that the Knob is properly installed back.
- When putting back the cover make sure that the LED are on the top to put it on the correct position.
- Do not forget to lock the cover when finished.
- Update the cylinder with the PPD in case it is an offline cylinder to update the internal clock and update the latest changes

Always leave the recommended distance between the door and the cylinder body in order not to interfere on the knob mechanisms.
