Wall reading unit A-WR02

Wall reading unit of the off-line hotel system

Our **new** MACS and TACS offline hotel system wall reader from our ACS-TTlock product portfolio has been **specially developed to accommodate hotel door locks.**

This wall reader can directly use the **hotel door lock management software** and **control** the electric mortise and magnetic **lock with the issued card**, thus facilitating the hotel to **improve its hotel security** management.

It is used in administrative buildings, factories, hotels, apartment houses. Easy to install and operate.
